

### Awardees of the 2021 Research Grants Program of the Consortium for Medical Marijuana Clinical Outcomes Research

Principal Investigator	Member Institution	Title	Approved Budget
Attonito, Jennifer	Florida Atlantic University	Acceptance of and access to medical marijuana and CBD as palliative care and hospice treatments for nursing home patients.	\$ 67,500
Brown, Joshua	University of Florida	Characterizing adverse drug events reports involving cannabis and cannabinoids	\$ 59,583
Cippitelli, Andrea	Florida Atlantic University	Investigating cannabidiol anti-headache actions through PPAR signaling	\$ 67,500
Eckel, Lisa	Florida State University	Cannabinoid modulation of neuroinflammation in a pre-clinical animal model of anorexia nervosa.	\$ 67,500
Edelmann, Mariola	University of Florida	The role of endocannabinoids and cannabinoids in the clearance of bacterial infections and macrophage polarization.	\$ 61,347
Fadool, Debra	Florida State University	Early Developmental Mechanisms of Action for Cannabidiol (CBD) in a Mouse Model of Anxiety	\$ 67,500
Marini, Simone	University of Florida	CBD-induced biomarkers of inflammation reduction in people living with HIV at the single cell level	\$ 61,190
Sachdeva, Mandip	Florida A&M University	Evaluation of Minor Cannabinoids loaded Exosomes in Chronic Diabetic Neuropathy.	\$ 67,500
Sagen, Jacqueline	University of Miami	Alleviation of phantom limb pain in a rat model by treatment with components of Cannabis	\$ 67,500
Wilkerson, Jenny L.	University of Florida	Translational examination of the pharmacological interactions of medical marijuana with neuropathic pain analgesics in both young and older adults.	\$ 61,362
Zimmermann, Ellen	University of Florida	The Effect of Delta-9-tetrahydrocannabinol (THC) on Intestinal Inflammation and Fibrosis in Experimental Crohn's disease	\$ 61,364
<b>Total Funding Amount</b>			<b>\$ 709,846</b>
